PROFESSIONAL SUMMARY

Data Analyst with experience developing ETL pipelines, AI-enabled workflows, and reporting automation across banking, insurance, and aviation. Skilled in Python, SQL, LangChain, and Pydantic, with a focus on building practical data and AI solutions that streamline processes and reduce manual work.

WORK EXPERIENCE

Société Générale Hong Kong
Data Analyst *Sept 2026 – Present*

- Built a Python ETL and internal LLM pipeline for an internal audit project, **screening 300+ contracts** and extracting relevant clauses for auditor review; applied document filtering and chunking to limit unnecessary LLM processing.
- Rebuilt the monthly APAC operational data ETL and analysis pipeline using Python, LangChain, and Pydantic, generating LLM-powered incident summaries, tags, categories, root-cause analysis, and **market-level executive summaries across eight markets**.

Airport Authority Hong Kong Hong Kong
IT Trainee *Jul 2025 – Sept 2026*

- Automated HKIA Dongguan Cargo Logistics reporting pipelines using Python and Power Automate, **reducing manual processing time by 75%** and delivering real-time insights via Power BI.
- Built a conversational cargo data agent using Databricks Genie and Unity Catalog, **enabling non-technical stakeholders to query cargo data in natural language on demand**.
- Deployed a recency, frequency, and monetary value (RFM) model for the Retail Department to **support customer segmentation and targeted marketing initiatives**.
- Developed a multi-source data aggregator using Power Automate to perform **automated AI summarization of pending actions, delivering daily executive briefings** via Microsoft Teams.

FWD Insurance Group Office Hong Kong
Group Customer Intern *Jun 2024 – Aug 2024*

- Developed an automated Power BI dashboard to **streamline claims analysis and support planning**.
- Created Excel templates and a Python script to automate insight generation across **nine business units**, supporting recurring analysis and reporting.

EDUCATION

Hong Kong Baptist University (HKBU) Hong Kong
BSc (Hons) in Business Computing and Data Analytics (BCDA), Minor in Marketing *2021 – 2025*

- cGPA: 3.95 / 4.0 | First Class Honours
- Scholarships: Belt and Road Scholarship (Malaysia); Full Admission Scholarship Scheme for Overseas Applicants; HKBU Computer Science Department Alumni Scholarship; Outstanding Student Scholarship for BCDA Students.
- Relevant coursework: Investment Management; Financial Technology for Banking and Finance; Big Data Analytics with Python; Data Mining and Knowledge Discovery; Natural Language Processing

PROJECTS

Predictive Modelling for Chiller Equipment Efficiency
Source code: github.com/EOngjk/Chiller-Efficiency-Prediction

- Developed a Python-based machine learning to predict air-cooled chiller efficiency at Tai Lung Veterinary Laboratory, Hong Kong, identifying **potential energy savings estimated at 20.95%**.
- Awarded the **EDPS Innovative Scholarship Award 2024–25 (HK$20,000)**.

TECHNICAL SKILLS

- **AI Engineering & LLM Applications:** LangChain, Pydantic, prompt engineering, document extraction and chunking, LLM-powered summarisation and classification
- **Programming & Automation:** Python (Pandas, NumPy, BeautifulSoup, regular expressions), SQL, Power Automate
- **Data Engineering & Platforms**: ETL pipeline development, data extraction and transformation, Databricks, Dataiku
- **Analytics & AI Tools:** Power BI, Streamlit, Microsoft Excel, Microsoft Copilot Studio, Databricks Genie

CERTIFICATIONS

- Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103)
- Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)
- ITIL® Foundation

LANGUAGES

- English (Fluent), Cantonese (Business proficient), Mandarin (Business proficient), Malay (Fluent)
